Notice

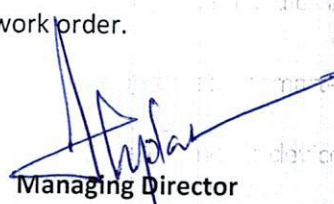

Quotation is invited from reputed software agencies for development of on-line life-certificate for the retired employees of NBSTC. Last date of submission is on 03.09.2026 up-to 5.00 pm.

Scope of work :

The proposed system should be modernize the annual life certificate submission process for pensioners for NBSTC, a mandatory requirement for uninterrupted pension disbursement. Utilizing secure, Aadhaar-based biometric (face-detection) authentication, the service will allow pensioners to submit their certificates digitally from home or designated centers, significantly reducing logistical hurdles and physical travel.

- **Client Software:** A Windows/Android application that runs on a PC, laptop, tablet, or smart-phone.
- **Biometric Authentication:** The application uses either a connected physical biometric device (fingerprint or iris scanner) or the smart-phone's front camera for face authentication.
- **Aadhaar Platform Integration:** It leverages the Unique Identification Authority of India (UIDAI) platform for real-time authentication.
- **Life Certificate Repository:** Successful authentication generates a unique "Pensioner ID" and the Digital Life Certificate (DLC) is stored in a central repository, accessible anytime by both the pensioner and the Pension Disbursing Agency (PDA).
- **Interfacing:** The system has specific interfaces for pensioners to generate/view/download their certificates.

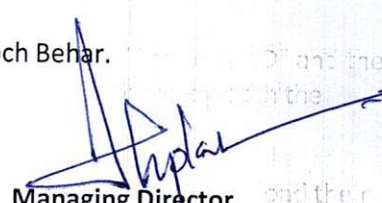

The software should be delivered within 50 days of issuing of work order.
